

## Press Release

# BIPEA WIDENS ITS PTS OFFER WITH A NEW PROFICIENCY TEST IN THE DOMAIN OF FOOD CONTAMINANTS

## PFAS IN FOOD

*July 2025,*

BIPEA is pleased to introduce a new Proficiency Test (PTS 117), allowing testing laboratories to detect PFAS in food samples.

This quality control test consists of two rounds, analyzing two distinct food samples: a salad and a whole egg in liquid form (100g). Participating laboratories will assess analytes such as Perfluorohexane sulfonic acid (PFHxS), Perfluorooctanoic acid (PFOA), Perfluorooctane sulfonic acid (PFOS), and Perfluorononanoic acid (PFNA).

As of July 2025, this PTS counts 10 registered participants from 7 different countries.

BIPEA is a scientific and independent non-profit organization that has been operating internationally for more than 50 years. It offers proficiency testing programs and external reference materials in various fields, including food, animal feed, environment, cosmetics, pharmaceuticals, hygiene, and more.

To learn more about the "PTS 117 – PFAS in food", equally as the comprehensive proficiency test offering, contact BIPEA at:
