

Press release

BIPEA OFFERED A NEW PROFICIENCY TEST IN THE FIELD OF FEED MICROBIOLOGY

MICROBIOLOGY IN FEED – *LISTERIA SPP* AND *LISTERIA MONOCYTOGENES*

2023,

BIPEA has launched a new interlaboratory test (PTS 105B), enabling testing laboratories to detect *Listeria spp* and *Listeria monocytogenes* in feed samples.

For this test, laboratories received 3 refrigerated samples of feed, some contaminated, others not. The aim was to assess the laboratories' ability to detect or not detect the requested parameters.

For more than 50 years, BIPEA has provided a wide range of proficiency tests and external reference materials for testing laboratories concerned by quality control and analytical accuracy in various fields (environment, food, cosmetics, pharmaceuticals).

To learn more about the "PTS 105B – Microbiology in Feed – *Listeria spp* and *Listeria monocytogenes*", as well as the full range of interlaboratory tests, please feel free to contact BIPEA:
