

BIPEA OFFERS A NEW PROFICIENCY TEST FOR THE FISHERY INDUSTRY

PHYSICO-CHEMICAL ANALYSIS ON FISH AND FISHERY PRODUCTS

December 2022,

BIPEA has launched a new Proficiency Testing Schemes (PTS 20G) which allow testing laboratories to evaluate their analytical performances by analyzing fish samples.

For this test, laboratories will be able to analyze a 600g frozen fish sample according to their usual methods. This PT offers the following parameters: Caloric value (moisture, ashes, water activity, pH, proteins, cholesterol, energy values...), Freshness (total volatile nitrogen (TVB-N), trimethylamine (TMA), Mineral (Calcium, Copper, Iron, Manganese, Magnesium...), Vitamins (Tocopherols, B1, B2, PP...), Fatty acid profile, Premi®Test.

To learn more about the "**PTS 20G – Fish and fishery products**", as well as the full range of proficiency tests, please feel free to contact BIPEA:
