Press release: Topic "Lab Testing"

BIPEA OFFERS A NEW PROFICIENCY TEST IN THE FIELD OF WATER MICROBIOLOGY

ENUMERATION OF YEASTS AND MOLDS IN FRESH WATER

February 2, 2022

BIPEA has created a new Proficiency Testing Schemes (PT 35d) dedicated to water microbiological testing laboratories. This quality control test is composed of 2 rounds and allows laboratories to enumerate yeasts and molds in fresh water.

For each round, two refrigerated samples of fresh water will be sent to the participants by express carriers dedicated to yeasts and molds counts. When performing analysis on samples, participating laboratories are required to apply their routine methods.

For more than 50 years, BIPEA has provided a wide range of proficiency tests and external reference materials for testing laboratories concerned by quality control and analytical accuracy in various fields (environment, food, cosmetics, pharmaceuticals).

To learn more about the "PT 35d - Fresh Water - Yeasts and molds", as well as the full range of proficiency tests, please feel free to contact BIPEA at:
