BIPEA OFFERED A NEW PROFICIENCY TEST IN THE FIELD OF SPIRITS

DEALCOHOLIZED SPIRITS

February 2024,

BIPEA launched a new interlaboratory test (PTS 18C) that allowed testing laboratories and spirits producers to assess their analytical performance by analyzing a sample of dealcoholized spirits.

For this test, the laboratories received a 750 ml sample and were able to analyze the following parameters using the usual methods: physico-chemical parameters, inorganic compounds, volatile compounds, organic acids, preservatives, alcohols, esters and other compounds.

This PTS registered 14 participants from 10 different countries.

For more than 50 years, BIPEA has provided a wide range of proficiency tests and external reference materials for testing laboratories concerned by quality control and analytical accuracy in various fields (environment, food, cosmetics, pharmaceuticals).

To learn more about the “PTS 18C – Dealcoholized spirits”, as well as the full range of interlaboratory tests, please feel free to contact BIPEA:
