BIPEA OFFERS A NEW PROFICIENCY TEST IN THE FIELD OF FEED

VETERINARY DRUGS IN FEED

May 2022,

BIPEA has created a new Proficiency Testing Schemes (PTS 107) dedicated to drugs testing. This quality control test is composed of one round and allows laboratories to analyse drugs in feed.

A sample of 250 grams of compound animal feed contaminated with antibiotics and coccidiostats will be sent to the participants. When performing analysis on samples, participating laboratories are required to apply their routine methods.

For more than 50 years, BIPEA has provided a complete range of proficiency tests and external reference materials for testing laboratories concerned by quality control and analytical accuracy in various fields (environment, food, cosmetics, pharmaceuticals).

To learn more about the "**PTS 107 – Veterinary drugs in feed**", as well as the full range of proficiency tests, please feel free to contact BIPEA:
